Profile

I am a 25-year-old Dynamics 365 Technical Consultant that is passionate about web development. I have spent the last three years focused on developing all IT skills using the Dynamics 365 platform as a base, covering work-shopping & discovery, functional configuration & through to bespoke development. After working with clients in the public, private & not-for-profit, these skills have been developed across a board range of business contexts.

My enjoyment when working with people sees me thrive in a team environment, delivering clear high-quality work. I am experienced in languages across the stack & cloud infrastructure. With my developing ability & willingness to learn, I am a versatile & adaptable developer & business employee.

Skills & Attributes

Professional

- D365 & Power Platform Technical Associate. Key focus includes: Custom workflows/plugins (.Net), PCF controls (TypeScript), Azure based integrations & Power Pages web customiations.
- Solid understanding of a wide range of programming concepts & their applications, currently focused in C#, JS, TypeScript, HTML & CSS/Sass. Prior experience in Python, PHP & Java.
- Azure development including App Services, Logic Apps, AD & DevOps Pipelines.
- Strong understanding of logical problems behind solution architecture allowing confident & effective design and debugging.
- Critical thinker, allowing analysis of programming & business problems.
- Experienced in working in agile project delivery executing client goals in dynamic environments.
- Dedicated to the complete the entirety of a task up to the required standards.
- Effective communicator in both internal team environments as well as client engagements.
- Wide understanding of business concepts.

Personal

- Videography & photography. Proficient in Adobe's Premier Pro, InDesign, Lightroom & Photoshop.

Education

-  Bachelor of Information Technology (Computer Science) with Distinction - 2019
-  Bachelor of Business (Marketing) - 2019

Experience

NTT (2020 - Current)

As a technical consultant, I engage with clients across the full IT life cycle. Key growth areas include client & server side customisation to the Power Platform using Typescript, JavaScript & .Net, system integration with Azure Resources & deployment patterns and processes using platform tools and Azure DevOps. Business level involvement sees me informing solution architecture and scoping of tenders. Below are some key engagement undertaken during this role:

Integration Consultant (2023)

- Lead for the migration of a .Net Web API used to communicate between a logistics company portal and CRM. Technical skills required refactoring of highly Object Orientated .Net Web API and implementation of Microsoft based authentication mechanism for client-side using single sign-on.

Dynamics 365 Solution Lead (2022)

- Dynamics 365 Solution Lead on a Non-For-Profit contact center. Delivery involved design of D365 architecture, development of first known deployment pattern & client-side customisation to bridge product gaps.

Technical Consultant (2021)

- Technical delivery of a regulatory bodies customer facing portal. Key items included a front-end payment integration, server-side submission validation and web page customisations.

Price My House Brisbane (2019 - 2020)

Bespoke freelance project for Priority Residential creating a dynamic PHP based web application for online appraisal lead generation for real estate sales.

Services Australia (2019)

A year long work experience as a part of the capstone units at QUT. Client brief included prototyping work on a UX/UI problem for the Newstart Allowance online claim process.
